IT'S TIME FOR **PL**atinum

Ø22MM CHROMED PLASTIC LPC

- operators made of polyamide with external chrome ring
- snap-on fast installation of the mounting base and contact elements
- panel fixing by threaded ring.

Ø30MM FLAT METAL LPF

- operators made of aluminium and zinc alloy
- actuator profile of only 4mm
- high strength and impact resistance
- ergonomic and functional
- screw panel fixing.

Ø22MM METAL LPS

- operators made of aluminium and zinc alloy
- high strength and impact resistance
- screw panel fixing.

■ QUICK AND EASY ACTUATOR INSTALLATION

LPS

Ø22mm METAL

- The operator **fits** into the Ø22mm panel hole with an adapter that retains it securely by two **screws**.

- The operator has a **seal** with **rubber grommets** which ensure stable fitting.

LPF

Ø30mm FLAT METAL

- The operator **fits** into the Ø30mm panel hole with an adapter that retains it securely by two **screws**.

- The operator has a **seal** with **rubber grommets** which ensure stable fitting.

LPC

Ø22mm CHROMED PLASTIC

- The operator mounts to the Ø22mm panel hole with a **threaded ring**. The mounting adapter **snaps** onto the back of the operator itself.

- The operator has a **seal** with **rubber grommets** to ensure stable fitting.
- The anti-rotation lug on the operator collapses into the seal to enable installation even to round holes without an anti-rotation notch.
- The mounting adapter and operators have **clearly visible reference marks** to facilitate snapping the operators onto the base.

HIGH DEGREE OF PROTECTION: IP66, IP67 AND IP69K

The actuators have been tested to guarantee a degree of protection per IEC/EN IP66, IP67, IP69K and per UL Type 4X, appropriate for use even in extreme ambient conditions.

ELEGANT STYLE AND ERGONOMIC DESIGN

All the series elements have an ergonomic design and, at the same time, particular care has been given to the finest detail aesthetics.

LONG ACTUATOR MECHANICAL LIFE

High performance characteristics assure 5,000,000 cycle mechanical life for spring return actuators, 1,000,000 for double and triple touch units and 300,000 for emergency-stop types.

MATERIALS RESISTANT TO OILS, SOLVENTS AND HYDROCARBONS

CUSTOMIZATION

To facilitate warehouse management, it is possible to purchase spring return or push-push button actuators without caps or lenses and at the same time caps and lenses as spare parts. This allows for custom buttons to be completed from stock.

HIGH STANDARDIZATION

Contact elements, LED light elements and a wide range of accessories are common to all types of the series.

USAGE AT EXTREME TEMPERATURE CONDITIONS

Operation temperature range between -25° and $+70^{\circ}\text{C}$.

CERTIFICATIONS

cULus, EAC, RINA and CCC.

■ CONTACT ELEMENTS

- **Common to all PLATINUM series operators.**
- Miniaturised size
- High electric conductivity - 5V 1mA
- Up to 9 contact elements can be installed
- Versions with screw, spring-clamp (push-in), Faston and base mount contact blocks for use with LPZP control stations
- Contact operation: double breaking action, direct (positive) action operation and wiping effect.
- Electrical contact and LED elements are **snapped onto** the mounting adapter
- **The activation of the middle contact is standard supplied** on all non-illuminated spring return and push-push button or selector switch actuators.

■ HIGH-LUMINOSITY LED ELEMENTS

- Miniaturised size
- Long electrical life: 100,000h
- Versions with screw, spring-clamp (push-in) and for bottom of LPZP control stations
- Overvoltage protection
- Withstand vibrations
- Protection against stray currents in wiring
- Flickering phenomenon reduction
- Steady and flashing light versions
- Supply voltages: 12...30VAC/DC, 85...140VAC, 185...265VAC
- Test elements installed alongside and connected with the relative LED element allow checking if all LED elements of the installation are working properly.

■ CONTACT AND LED ELEMENTS WITH SPRING-CLAMP (PUSH-IN) TECHNOLOGY

PUSH-IN technology reduces the time required to connect stiff cables and cables with crimped terminals. The wire simply inserts into the clamp for a secure, sealed connection - **no screwdriver needed!** The clamping force is long-lasting and unaffected by vibration and impact.
